the work accomplished at the mine of the Consolidated Spanish Beit Silver Mining company for two weeks, ending June 21:

San Pedro Work in the east drift of the first level has consisted of crosscutting and raising.

The north crosscut was advanced 22 feet, making the total now 26 feet. A barren quartz stringer was

cut. The formation is hard lime. The south crosscut was advanced 17 feet, making the total length now 77 feet. The last 17 feet have been in a zone of altered lime and quartz stringers. The whole zone carries low values but nothing commercial. On the footwall there is a ream 6 to 8 Inches wide which yielded assays from \$90 up, but its

extent has not been proven-Mill Construction All the frame is now up, including orebins. The lower floors have been closed in. Roofing will be put on within a few days.
